

The most astute readers of NCToday may notice that some of the graphs herein, such as the unemployment rate trend and labor force participation, appear to show slightly different figures compared to the last publication. Following our annual LAUS and CES data revision processes, some of the monthly spikes and drops were leveled out. However, the overall long-term trends still hold. This is a reminder to be judicious when interpreting the month-to-month movements in economic data. Instead, focus on longer trends. You can read more about this process and what it tells us about NC's economy on our LEAD Feed blog at <http://bit.ly/2pdNsl8>.

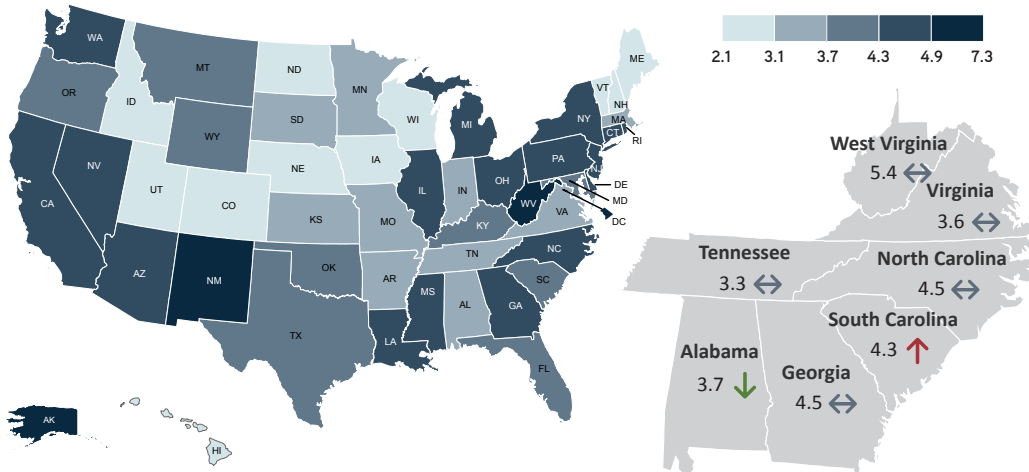

Unemployment Rate Trend

NC
4.4 percentage points from 8.9% in January 2013

US
3.9 percentage points from 8% in January 2013

Unemployment Rate Comparison

Philadelphia Federal Reserve Leading Indicators for North Carolina

This leading index predicts the six-month growth rate of the state's economy (as measured by the Phil Fed's current indicator index). A positive number reflects economic growth, while a negative projects a decline.
