

North Carolina Community Investment Report

Projects Announced between 01/01/2018 and 12/31/2018

The Community Investment Report (CIR) database of economic development announcement information for North Carolina measures capital investment and job creation by new and existing businesses in the state. The CIR database and reporting are managed by the Economic Development Partnership of North Carolina (EDPNC). For inquiries about this information, call (919) 447-7793 or email cir@edpnc.com.

Job creation and investment figures are totals of announced or planned jobs, not actual hiring counts of workers or actual investment. The CIR database does not include every dollar of capital investment, or job announcement in North Carolina, but it is the most complete source of statewide, project-level economic development activity currently available. As a result, the data provide the Department of Commerce and the entire economic development community with a measure of the type and value of investment in the State. In addition, for reporting purposes, confidential data have been aggregated with publicly announced data to produce totals for capital investment and job creation. Please contact the CIR staff with

County	Announced Date	Company	Announced Jobs	Facility Type	Total Square Footage	Announced Investment	Economic Development Project Type	Project NAICS	Product	Parent Country
