NCWorks Partnership Conference

October 9-11, 2024

Unleash the Power of Tomorrow

A Future Shaped by Ideas, Connections, and Community

This year our event will continue efforts on inclusion, with an additional focus on North Carolina's booming economy and how the workforce system ensures opportunities for everyone to participate in and benefit from that economic growth. Our goals are:

- Build an inclusive workforce:** Continue to share ideas and strategies that lead to inclusion in the growing workforce for untapped demographic groups, with emphasis on the justice-involved, Opportunity Youth, those on public assistance (incl Medicaid Expansion), people with disabilities, and veterans.
- Increase community outreach:** Identify and use new ideas and strategies to educate the community – job seekers, businesses, and workforce partners - about our services.
- Highlight the critical role of quality workforce services:** Educate staff and the public about how workforce services intersect with and support NC's robust economic growth.
- Understand the clean energy sector:** Inform staff and the public about employer needs, available jobs at all skill levels, training for jobs, and impact on areas of the state where a manufacturer is not located. Includes: EV, wind, solar, green construction.

Proposals due by April 5!

Information security analysts plan and carry out security measures to protect an organization's computer networks and systems. Their responsibilities are continually expanding as the number of cyberattacks increase.

What do they typically do

- Research the latest information technology (IT) security trends
- Monitor organizational networks for security breaches and investigate a violation when one occurs
- Recommend security enhancements to management or senior IT staff
- Conduct penetration testing, which is when analysts simulate attacks to look for vulnerabilities in their systems before they can be exploited
- Develop security standards and best practices for their organization
- Prepare reports that document security breaches and the extent of the damage caused by the breaches
- Help plan and carry out an organization's way of handling security
- Install and use software, such as firewalls and data encryption programs, to protect sensitive information
