North Carolina's March County and Area Employment Figures Released

RALEIGH —Unemployment rates (not seasonally adjusted) decreased in 81 of North Carolina's counties in March, increased in three, and remained unchanged in 16. Hyde County had the highest unemployment rate at 11.5 percent, while Buncombe County had the lowest at 3.2 percent. 13 of the state's metro areas experienced rate decreases and two remained unchanged. Among the metro areas, Rocky Mount at 5.3 percent had the highest rate and Asheville had the lowest rate at 3.3 percent. The March not seasonally adjusted statewide rate was 4.1 percent.

	Counties With Rates 5% or Below	Counties With Rates Between 5% and 10%	Counties With Rates 10% or Above
March	75	24	1
February (Revised)	68	31	1

When compared to the same month last year, not seasonally adjusted unemployment rates increased in 61 counties, decreased in 26, and remained unchanged in 13. Nine metro areas experienced rate increases over the year, three declined, and three remained unchanged.

The number of workers employed statewide (not seasonally adjusted) increased in March by 34,495 to 4,858,751, while those unemployed decreased 4,855 to 206,445. Since March 2018, the number of workers employed statewide increased 72,828, while those unemployed increased 5,360.

It is important to note that employment estimates are subject to large seasonal patterns; therefore, it is advisable to focus on over-the-year changes in the not seasonally adjusted estimates.

The next unemployment update is scheduled for Friday, May 17, 2019 when the state unemployment rate for April 2019 will be released.

These data can be accessed on the Commerce website at <https://d4.nccommerce.com/>

Accessing Data

The data presented in this press release, as well as historical data, can be accessed from NC Commerce's Demand Driven Data Delivery ("D4") system:

<https://d4.nccommerce.com/LausSelection.aspx>

Technical Notes

This release presents labor force and unemployment estimates from the Local Area Unemployment Statistics (LAUS) program. The LAUS program is a federal-state cooperative endeavor.

Labor force and unemployment--from the LAUS program

Definitions. The labor force and unemployment estimates are based on the same concepts and definitions as those used for the official national estimates obtained from the Current Population Survey (CPS), a sample survey of households that is conducted for the Bureau of Labor Statistics (BLS) by the U.S. Census Bureau. The LAUS program measures employment and unemployment on a place-of-residence basis. The universe for each is the civilian noninstitutional population 16 years of age and over. Employed persons are those who did any work at all for pay or profit in the reference week (the week including the 12th of the month) or worked 15 hours or more without pay in a family business or farm, plus those not working who had a job from which they were temporarily absent, whether or not paid, for such reasons as bad weather, labor-management dispute, illness, or vacation. Unemployed persons are those who were not employed during the reference week (based on the definition above), had actively looked for a job sometime in the 4-week period ending with the reference week, and were currently available for work; persons on lay-off expecting recall need not be looking for work to be counted as unemployed. The labor force is the sum of employed and unemployed persons. The unemployment rate is the number of unemployed as a percent of the labor force.

Method of estimation. Statewide estimates are produced using an estimation algorithm administered by the BLS. This method, which underwent substantial enhancement at the beginning of 2015, utilizes data from several sources, including the CPS, Current Employment Statistics (CES), and state unemployment insurance (UI) programs. Substate estimates are produced using the "LAUS Handbook Method", which is also based on data from several sources. Each month, census division estimates are controlled to national totals, and state estimates are then controlled to their respective division totals. Substate estimates are controlled to their respective state totals. For more information about LAUS estimation procedures, see the BLS website at www.bls.gov/lau/laumthd.htm

Revisions. Labor force and unemployment data for the previous month reflect adjustments made in each subsequent month, while data for prior years reflect adjustments made at the end of each year. The monthly revisions incorporate updated model inputs, while the annually revised estimates reflect updated population data from the U.S. Census Bureau, any revisions in the other data sources, and model reestimation.

Area definitions. The substate area data published in this release reflect the delineations that were issued by the U.S. Office of Management and Budget on April 10, 2018. A detailed list of the geographic definitions is available online at www.bls.gov/lau/lausmsa.htm.

Reliability of the estimates

The estimates presented in this release are based on sample surveys, administrative data, and modeling and, thus, are subject to sampling and other types of errors. Sampling error is a measure of sampling variability--that is, variation that occurs by chance because a sample rather than the entire population is surveyed. Survey data also are subject to nonsampling errors, such as those which can be introduced into the data collection and processing operations. Estimates not directly derived from sample surveys are subject to additional errors resulting from the specific estimation processes used.

Model-based error measures for seasonally adjusted and not seasonally adjusted data and for over-the-month and over-the-year changes to LAUS statewide estimates are available online at www.bls.gov/lau/lastderr.htm.

Release Dates

The next unemployment update is scheduled for Friday, May 17, 2019 when the state unemployment rate for April 2019 will be released.

The complete 2019 data release schedule can be accessed at:

Counties With Lowest Unemployment Rates

March 2019*

(Not Seasonally Adjusted)

Metropolitan Statistical Areas' Unemployment Rates

March 2019*

(Not Seasonally Adjusted)

*All March 2019 data are preliminary.

North Carolina's statewide unemployment rate (not seasonally adjusted) was 4.1 percent in March. This decreased 0.1 of a percentage point from February's revised rate, and increased 0.1 of a percentage point over the year.

Over the month, the unemployment rate decreased in 81 of North Carolina's 100 counties. Forty-two counties had unemployment rates at or below the state's 4.1 percent rate.

Hyde County recorded March's highest unemployment rate at 11.5 percent, followed by Tyrrell at 7.9 percent, Dare at 7.0 percent, and Scotland at 6.9 percent. Buncombe County had the lowest unemployment rate at 3.2 percent.

Unemployment rates decreased in 13 of the state's 15 Metropolitan Statistical Areas (MSAs) over the month. The Rocky Mount MSA had the highest unemployment rate in March at 5.3 percent, followed by Fayetteville at 5.2 percent, Jacksonville at 4.9 percent, and Goldsboro & New Bern at 4.4 percent. Asheville reported the month's lowest unemployment rate at 3.3 percent, followed by Raleigh at 3.6 percent.

Note: All data are Not Seasonally Adjusted. All March 2019 data are preliminary.

Over the month, net industry employment increased in 13 of North Carolina's 15 MSAs. Charlotte/Concord/Gastonia, NC-SC had the largest net employment increase with 12,700, followed by Raleigh, 3,300; Asheville, 2,000; and Durham-Chapel Hill, 1,100. Burlington & Charlotte/Concord/Gastonia, NC-SC experienced the greatest percentage increase at 1.1 percent, followed by Asheville, 1.0 percent; Jacksonville, 0.8 percent; and New Bern, 0.7 percent. It is important to note that employment estimates are subject to large seasonal patterns; therefore, it is advisable to focus on over-the-year changes in the not seasonally adjusted series.

Over the year, employment increased in 9 of 15 MSAs. Charlotte/Concord/Gastonia, NC-SC had the largest net employment increase at 29,200, followed by Raleigh, 7,100; Asheville, 5,900; Winston-Salem, 5,500; and Durham-Chapel Hill, 2,600. Asheville had the greatest percentage increase at 3.0 percent, followed by Charlotte/Concord/Gastonia, NC-SC, 2.4 percent; and Winston-Salem, 2.1 percent.

 Prepared by the Labor & Economic Analysis, North Carolina Department of Commerce 4_2019

Several trends have emerged over the past 12-18 months that signal a slowdown in North Carolina's economy – not a recession or the forecast of an imminent recession, but a change from more recent growth. The charts and data in this publication illustrate several areas to watch. Average weekly wages haven't grown in several months. Housing permits peaked over a year ago. Manufacturing production has slowed in particular sectors. Despite conditions in these areas, unemployment remains low by historical standards and jobs are continuing to grow – two trends that may have slowed a bit but do not appear to be reversing.
