North Carolina's October Employment Figures Released

RALEIGH — The state's seasonally adjusted October unemployment rate was 6.3 percent, decreasing 0.9 of a percentage point from September's revised rate. The national rate decreased 1.0 percentage point to 6.9 percent.

North Carolina's October 2020 unemployment rate increased 2.6 percentage points from a year ago. The number of people employed increased 79,754 over the month to 4,623,968 and decreased 294,266 over the year. The number of people unemployed decreased 41,542 over the month to 310,292 and increased 123,820 over the year.

Seasonally adjusted Total Nonfarm industry employment, as gathered through the monthly establishment survey, increased 26,400 to 4,346,400 in October. Major industries experiencing increases were Leisure & Hospitality Services, 12,600; Professional & Business Services, 12,100; Financial Activities, 2,900; Manufacturing, 2,900; Trade, Transportation & Utilities, 2,800; Construction, 1,700; Information, 1,600; and Other Services, 500. Major industries experiencing decreases were Government, 10,000; and Education & Health Services, 700. Mining & Logging employment remained unchanged.

Seasonally Adjusted Unemployment Rates since October 2019

	Oct 2019	Nov 2019	Dec 2019	Jan 2020	Feb 2020	Mar 2020	Apr 2020	May 2020	Jun 2020	Jul 2020	Aug 2020	Sep 2020	Oct 2020
N.C.	3.7	3.6	3.6	3.6	3.6	4.3	12.9	12.8	7.5	8.5	6.5	7.2	6.3
U.S.	3.6	3.5	3.5	3.6	3.5	4.4	14.7	13.3	11.1	10.2	8.4	7.9	6.9

Please note: 2019 numbers have undergone annual revision

Since October 2019, Total Nonfarm jobs decreased 238,200 with the Total Private sector decreasing by 209,000 and Government decreasing by 29,200. The only major industry experiencing an over-the-year increase was Financial Activities, 2,400. Major industries experiencing decreases were Leisure & Hospitality Services, 104,100; Education & Health Services, 38,700; Manufacturing, 37,900; Government, 29,200; Trade, Transportation & Utilities, 9,900; Construction, 8,500; Professional & Business Services, 5,800; Information, 3,900; Other Services, 2,400; and Mining & Logging, 200.

The next unemployment update is scheduled for Thursday, December 3, 2020 when the county unemployment rates for October 2020 will be released.

 All 2019 Labor Force and CES estimates have been benchmarked.
 Estimates may not add to totals due to rounding.

Accessing Data

The data presented in this press release, as well as historical data, can be accessed from NC Commerce's Demand Driven Data Delivery ("D4") system:

<https://d4.nccommerce.com/LausSelection.aspx>

<https://d4.nccommerce.com/CesSelection.aspx>

Technical Notes

This release presents labor force and unemployment estimates from the Local Area Unemployment Statistics (LAUS) program. Also presented are nonfarm payroll employment estimates from the Current Employment Statistics (CES) program. The LAUS and CES programs are both federal-state cooperative endeavors.

Labor force and unemployment--from the LAUS program

Definitions. The labor force and unemployment estimates are based on the same concepts and definitions as those used for the official national estimates obtained from the Current Population Survey (CPS), a sample survey of households that is conducted for the Bureau of Labor Statistics (BLS) by the U.S. Census Bureau. The LAUS program measures employment and unemployment on a place-of-residence basis. The universe for each is the civilian noninstitutional population 16 years of age and over. Employed persons are those who did any work at all for pay or profit in the reference week (the week including the 12th of the month) or worked 15 hours or more without pay in a family business or farm, plus those not working who had a job from which they were temporarily absent, whether or not paid, for such reasons as bad weather, labor-management dispute, illness, or vacation. Unemployed persons are those who were not employed during the reference week (based on the definition above), had actively looked for a job sometime in the 4-week period ending with the reference week, and were currently available for work; persons on lay-off expecting recall need not be looking for work to be counted as unemployed. The labor force is the sum of employed and unemployed persons. The unemployment rate is the number of unemployed as a percent of the labor force.

Method of estimation. Statewide estimates are produced using an estimation algorithm administered by the BLS. This method, which underwent substantial enhancement at the beginning of 2015, utilizes data from several sources, including the CPS, the CES, and state unemployment insurance (UI) programs. Each month, census division estimates are controlled to national totals, and state estimates are then controlled to their respective division totals. Substate estimates are controlled to their respective state totals. For more information about LAUS estimation procedures, see the BLS website at <https://www.bls.gov/opub/hom/lau/calculation.htm>

Revisions. Labor force and unemployment data for the previous month reflect adjustments made in each subsequent month, while data for prior years reflect adjustments made at the end of each year. The monthly revisions incorporate updated model inputs, while the annually revised estimates reflect updated population data from the U.S. Census Bureau, any revisions in the other data sources, and model reestimation. In most years, historical data for the most recent five years (both seasonally adjusted and not seasonally adjusted) are revised near the beginning of each calendar year, prior to the release of January estimates.

Seasonal adjustment. The LAUS program introduced smoothed seasonally adjusted (SSA) estimates in January 2010. These are seasonally-adjusted data that have incorporated a long-run trend smoothing procedure, resulting in estimates that are less volatile than those previously produced. The estimates are smoothed using a filtering procedure, based on moving averages, to remove the irregular fluctuations from the seasonally-adjusted series, leaving the trend. The same process is used on both historical and current year estimates. For more information about the smoothing technique, see the BLS website at <https://www.bls.gov/lau/lauseas.htm>.

Area definitions. The substate area data published in this release reflect the delineations that were issued by the U.S. Office of Management and Budget on April 10, 2018. A detailed list of the geographic definitions is available online at www.bls.gov/lau/lausmsa.htm.

Employment--from the CES program

Definitions. Employment data refer to persons on establishment payrolls who receive pay for any part of the pay period that includes the 12th of the month. Persons are counted at their place of work rather than at their place of residence; those appearing on more than one payroll are counted on each payroll. Industries are classified on the basis of their principal activity in accordance with the 2017 version of the North American Industry Classification System.

Method of estimation. CES State and Area employment data are produced using several estimation procedures. Where possible these data are produced using a "weighted link relative" estimation technique in which a ratio of current-month weighted employment to that of the previous-month weighted employment is computed from a sample of establishments reporting for both months. The estimates of employment for the current month are then obtained by multiplying these ratios by the previous month's employment estimates. The weighted link relative technique is utilized for data series where the sample size meets certain statistical criteria.

For some employment series, relatively small sample sizes limit the reliability of the weighted link-relative estimates. In these cases, BLS uses the CES small domain model (SDM) to generate employment estimates. The SDM combines the direct sample estimates (described above) and forecasts of historical (benchmarked) data to decrease the volatility of the estimates. For more detailed information about the CES small domain model, refer to the BLS Handbook of Methods.

Annual revisions. Employment estimates are adjusted annually to a complete count of jobs, called benchmarks, derived principally from tax reports that are submitted by employers who are covered under state unemployment insurance (UI) laws. The benchmark information is used to adjust the monthly estimates between the new benchmark and the preceding one and also to establish the level of employment for the new benchmark month. Thus, the benchmarking process establishes the level of employment, and the sample is used to measure the month-to-month changes in the level for the subsequent months. Information on recent benchmark revisions is available online at www.bls.gov/web/laus/benchmark.pdf.

Seasonal adjustment. Payroll employment data are seasonally adjusted at the statewide supersector level. In some states, the seasonally adjusted payroll employment total is computed by aggregating the independently adjusted supersector series. In other states, the seasonally adjusted payroll employment total is independently adjusted. Revisions of historical data for the most recent 5 years are made once a year, coincident with annual benchmark adjustments.

Reliability of the estimates

The estimates presented in this release are based on sample surveys, administrative data, and modeling and, thus, are subject to sampling and other types of errors. Sampling error is a measure of sampling variability—that is, variation that occurs by chance because a sample rather than the entire population is surveyed. Survey data also are subject to nonsampling errors, such as those which can be introduced into the data collection and processing operations. Estimates not directly derived from sample surveys are subject to additional errors resulting from the specific estimation processes used. Model-based error measures for seasonally adjusted and not seasonally adjusted data and for over-the-month and over-the-year changes to LAUS estimates are available online at www.bls.gov/lau/lastderr.htm. Measures of sampling error for state CES data at the total nonfarm and supersector levels are available online at www.bls.gov/sae/790stderr.htm.

Release Dates

The next unemployment update is scheduled for Thursday, December 3, 2020 when the county unemployment rates for October 2020 will be released.

The complete data release schedule for 2020 can be accessed here:

<https://www.nccommerce.com/documents/release-dates-unemployment-rates>

United States/North Carolina Unemployment Rates October 2019–October 2020 (Seasonally Adjusted)

The North Carolina seasonally adjusted unemployment rate was 6.3 percent in October, decreasing 0.9 of a percentage point from September's revised rate and growing 2.6 percentage points from October 2019. Over the month, the number of persons unemployed decreased by 41,542 (11.8%). The civilian labor force grew by 38,212 (0.8%) to 4,934,260.

Nationally, October's unemployment rate was 6.9 percent. The number of persons unemployed was 11,061,000, while the civilian labor force was 160,867,000.

Seasonally adjusted Total Nonfarm industry employment (4,346,400) increased 26,400 (0.6%) since September 2020 and fell 238,200 (5.2%) since October 2019. Private sector employment increased 36,400 (1.0%) over the month and decreased 209,000 (5.4%) over the year.

Of the major industries for which payroll data are seasonally adjusted, Leisure & Hospitality Services (12,600; 3.1%) had the largest over-the-month increase in jobs, followed by Professional & Business Services (12,100; 1.9%), Financial Activities (2,900; 1.1%), Manufacturing (2,900; 0.7%), Trade, Transportation & Utilities (2,800; 0.3%), Construction (1,700; 0.8%), Information (1,600; 2.3%), and Other Services (500; 0.3%). Government (10,000; 1.4%) reported the largest over-the-month decrease, followed by Education & Health Services (700; 0.1%). Mining & Logging remained unchanged over the month.

Since October 2019, Financial Activities (2,400; 0.9%) reported the only jobs increase over the year. Leisure & Hospitality Services (104,100; 20.0%) reported the largest over-the-year decrease, followed by Education & Health Services (38,700; 6.2%), Manufacturing (37,900; 7.9%), Government (29,200; 4.0%), Trade, Transportation & Utilities (9,900; 1.2%), Construction (8,500; 3.7%), Professional & Business Services (5,800; 0.9%), Information (3,900; 5.1%), Other Services (2,400; 1.5%), and Mining & Logging (200; 3.5%).

Note: It is important to note that industry employment estimates are subject to large seasonal patterns. Seasonal adjustment factors are applied to the data. However, these factors may not be fully capturing the seasonal trend. Therefore, when interpreting the changes in industry employment, it is advisable to focus on over-the-year changes in both the seasonally adjusted and not seasonally adjusted series.

North Carolina Total Nonfarm Employment October 2019–October 2020 (Seasonally Adjusted)

Changes in Employment by NAICS Industries October 2019 Compared to October 2020 (Seasonally Adjusted)

Note: North Carolina 2020 current month estimates are preliminary, while previous month estimates are revised. North Carolina 2019 estimates have undergone annual revision.

North Carolina Labor Market Conditions

The October 2020 not seasonally adjusted Total Nonfarm employment level of 4,377,700 was 53,000 (1.2%) higher than the September 2020 not seasonally adjusted employment level of 4,324,700. Among the major industries in North Carolina, Professional & Business Services had the largest over-the-month increase in employment at 16,200 (2.6%), followed by Leisure & Hospitality Services (10,600; 2.6%), Education & Health Services (6,400; 1.1%), Trade, Transportation & Utilities (5,300; 0.6%), Manufacturing (3,100; 0.7%), Construction (3,000; 1.3%), Government (2,900; 0.4%), Financial Activities (2,000; 0.8%), Information (1,900; 2.7%), and Other Services (1,600; 1.0%). Mining & Logging remained unchanged over the month.

Over the year, the Service Providing sector (all industries except Mining & Logging, Construction, and Manufacturing) showed a decrease of 194,500 (5.0%) jobs. Financial Activities (1,700; 0.7%) reported the only increase over the year. Leisure & Hospitality Services had the largest over-the-year decrease in employment at 105,600 (20.3%), followed by Education & Health Services (37,600; 6.0%), Government (27,800; 3.7%), Trade, Transportation & Utilities (11,100; 1.3%), Professional & Business Services (8,400; 1.3%), Information (3,500; 4.6%), and Other Services (2,200; 1.4%).

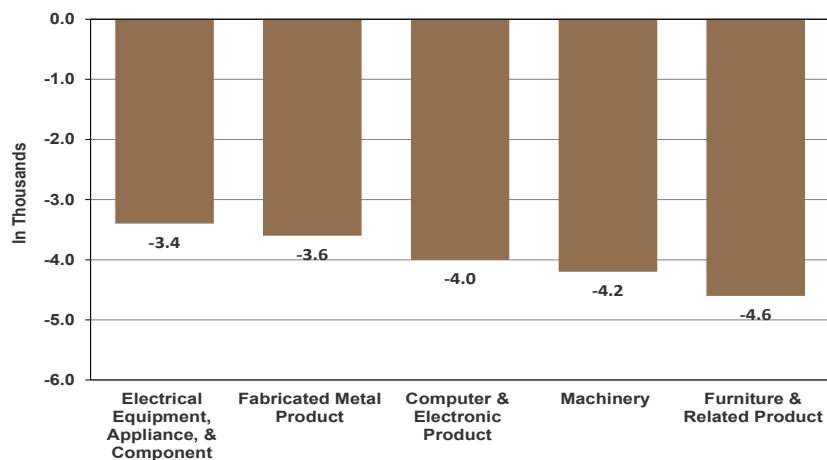

The Goods Producing sector decreased by 45,600 (6.3%) jobs over the year. Manufacturing had the largest decrease with 37,700 (7.9%), followed by Construction (7,700; 3.3%) and Mining & Logging (200; 3.5%).

Amongst manufacturing industries, Furniture & Related Product had the largest net over-the-year decline with the loss of 4,600 jobs. Other manufacturing industries with decreases were: Machinery, 4,200; Computer & Electronic Product, 4,000; Fabricated Metal Product, 3,600; Electrical Equipment, Appliance & Component, 3,400; Textile Mills, 3,300; Plastics & Rubber Products, 2,900; Food, 2,600; Printing & Related Support Activities, 2,300; Transportation Equipment, 2,200; Chemical, 1,800; Wood Product, 1,600; Apparel, 400; and Beverage & Tobacco Product, 300. Textile Product Mills (100; 1.7%) and Pharmaceutical & Medicine Manufacturing (100; 0.5%) reported an increase over the year.

Over the month, Average Weekly Hours for total private workers in October increased 6 minutes to 34.7 from September's revised rate of 34.6. Average Hourly Earnings grew by \$0.21 to \$26.98, as Average Weekly Earnings increased by \$9.97 to \$936.21.

Over the year, Average Weekly Hours for total private workers in October increased 24 minutes from the rate of 34.3 in October 2019. Average Hourly Earnings grew by \$1.49 and Average Weekly Earnings increased \$61.90.

Selected Manufacturing Industries With Job Losses October 2019–October 2020 (Not Seasonally Adjusted)

Selected Service Industries With Job Losses October 2019–October 2020 (Not Seasonally Adjusted)

Total Private Average Weekly Wage October 2017–October 2020 (Not Seasonally Adjusted)
