## North Carolina’s October County and Area Employment Figures Released

**RALEIGH** — Unemployment rates (not seasonally adjusted) decreased in 83 of North Carolina’s counties in October, increased in eight, and remained unchanged in nine. Scotland County had the highest unemployment rate at 7.8 percent while Orange County had the lowest at 2.6 percent. Thirteen of the state’s metro areas experienced rate decreases, one increased, and one remained unchanged. Among the metro areas, Rocky Mount had the highest rate at 5.8 percent while Durham-Chapel Hill had the lowest at 2.9 percent. The October not seasonally adjusted statewide rate was 3.6 percent.

	Counties With Rates 5% or Below	Counties With Rates Between 5% and 10%	Counties With Rates 10% or Above
<b>October</b>	87	13	0
<b>September (Revised)</b>	86	14	0

When compared to the same month last year, not seasonally adjusted unemployment rates decreased in all 100 counties. All 15 of the state’s metro areas experienced rate decreases over the year.

The number of workers employed statewide (not seasonally adjusted) increased in October by 19,925 to 4,884,941, while those unemployed decreased by 5,888 to 184,904. Since October 2020, the number of workers employed statewide increased 156,670, while those unemployed decreased 140,164.

It is important to note that employment estimates are subject to large seasonal patterns; therefore, it is advisable to focus on over-the-year changes in the not seasonally adjusted estimates.

The next unemployment update is scheduled for Friday, December 17, 2021 when the state unemployment rate for November 2021 will be released.

**These data can be accessed on the Commerce website at <https://d4.nccommerce.com/>**

Not Seasonally Adjusted

Estimates subject to monthly and annual revisions.

North Carolina Department of Commerce  
Labor & Economic Analysis Division  
Local Area Unemployment Statistics  
(919) 707-1500

## **Accessing Data**

The data presented in this press release, as well as historical data, can be accessed from NC Commerce's Demand Driven Data Delivery ("D4") system:

<https://d4.nccommerce.com/LausSelection.aspx>

## **Technical Notes**

This release presents labor force and unemployment estimates from the Local Area Unemployment Statistics (LAUS) program. The LAUS program is a federal-state cooperative endeavor.

### **Labor force and unemployment--from the LAUS program**

**Definitions.** The labor force and unemployment estimates are based on the same concepts and definitions as those used for the official national estimates obtained from the Current Population Survey (CPS), a sample survey of households that is conducted for the Bureau of Labor Statistics (BLS) by the U.S. Census Bureau. The LAUS program measures employment and unemployment on a place-of-residence basis. The universe for each is the civilian noninstitutional population 16 years of age and over. Employed persons are those who did any work at all for pay or profit in the reference week (the week including the 12th of the month) or worked 15 hours or more without pay in a family business or farm, plus those not working who had a job from which they were temporarily absent, whether or not paid, for such reasons as bad weather, labor-management dispute, illness, or vacation. Unemployed persons are those who were not employed during the reference week (based on the definition above), had actively looked for a job sometime in the 4-week period ending with the reference week, and were currently available for work; persons on lay-off expecting recall need not be looking for work to be counted as unemployed. The labor force is the sum of employed and unemployed persons. The unemployment rate is the number of unemployed as a percent of the labor force.

**Method of estimation.** Statewide estimates are produced using an estimation algorithm administered by the BLS. This method, which underwent substantial enhancement at the beginning of 2021, utilizes data from several sources, including the CPS, Current Employment Statistics (CES), and state unemployment insurance (UI) programs. Substate estimates are produced using the "LAUS Handbook Method", which is also based on data from several sources. Each month, census division estimates are controlled to national totals, and state estimates are then controlled to their respective division totals. Substate estimates are controlled to their respective state totals. For more information about LAUS estimation procedures, see the BLS website at <https://www.bls.gov/opub/hom/lau/calculation.htm>.

**Revisions.** Labor force and unemployment data for the previous month reflect adjustments made in each subsequent month, while data for prior years reflect adjustments made at the end of each year. The monthly revisions incorporate updated model inputs, while the annually revised estimates reflect updated population data from the U.S. Census Bureau, any revisions in the other data sources, and model reestimation.

**Area definitions.** The substate area data published in this release reflect the delineations that were issued by the U.S. Office of Management and Budget on April 10, 2018. A detailed list of the geographic definitions is available online at [www.bls.gov/lau/lausmsa.htm](http://www.bls.gov/lau/lausmsa.htm).

### Reliability of the estimates

The estimates presented in this release are based on sample surveys, administrative data, and modeling and, thus, are subject to sampling and other types of errors. Sampling error is a measure of sampling variability--that is, variation that occurs by chance because a sample rather than the entire population is surveyed. Survey data also are subject to nonsampling errors, such as those which can be introduced into the data collection and processing operations. Estimates not directly derived from sample surveys are subject to additional errors resulting from the specific estimation processes used.

Model-based error measures for seasonally adjusted and not seasonally adjusted data and for over-the-month and over-the-year changes to LAUS statewide estimates are available online at [www.bls.gov/lau/lastderr.htm](http://www.bls.gov/lau/lastderr.htm).

### Release Dates

The next unemployment update is scheduled for Friday, December 17, 2021 when the state unemployment rate for November 2021 will be released.

The complete 2021 data release schedule can be accessed at:

<https://www.nccommerce.com/documents/release-dates-unemployment-rates>

## Counties With Highest Unemployment Rates October 2021\* (Not Seasonally Adjusted)

North Carolina's statewide unemployment rate (not seasonally adjusted) was 3.6 percent in October. This decreased 0.2 of a percentage point from September's revised rate, and declined 2.8 percentage points over the year.

Over the month, the unemployment rate decreased in 83 of North Carolina's 100 counties. Fifty-five counties had unemployment rates at or below the state's 3.6 percent rate.

Scotland County recorded October's highest unemployment rate at 7.8 percent, followed by Edgecombe at 7.2 percent. Orange County had the lowest unemployment rate at 2.6 percent, followed by Chatham, Watauga, Avery, and Ashe Counties each at 2.7 percent.

## Counties With Lowest Unemployment Rates October 2021\* (Not Seasonally Adjusted)

Unemployment rates decreased in 13 of the state's 15 Metropolitan Statistical Areas (MSAs) over the month. The Rocky Mount MSA had the highest unemployment rate in October at 5.8 percent. The Durham/Chapel Hill MSA reported the month's lowest unemployment rate at 2.9 percent, followed by Asheville and Raleigh at 3.0 percent each.

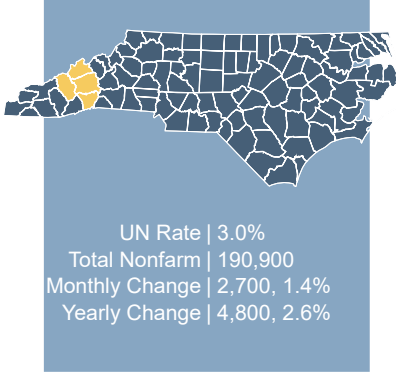

## Metropolitan Statistical Areas' Unemployment Rates October 2021\* (Not Seasonally Adjusted)

\*All October 2021 data are preliminary.

\*Data unavailable due to sample cell size. Note: All data are Not Seasonally Adjusted. All October 2021 data are preliminary.

Over the month, all of North Carolina's 15 MSAs experienced net job increase. Charlotte/Concord/Gastonia, NC-SC had the largest net employment increase with 16,000, followed by Raleigh, 9,400; Durham/Chapel Hill, 6,800; Greensboro/High Point, 4,800; Winston-Salem, 4,000; and Asheville, 2,700. Durham/Chapel Hill had the greatest percentage increase at 2.1%, followed by Rocky Mount and Winston-Salem at 1.5% each. It is important to note that employment estimates are subject to large seasonal patterns; therefore, it is advisable to focus on over-the-year changes in the not seasonally adjusted series.

Over the year, employment increased in all of North Carolina's 15 MSAs. Charlotte/Concord/Gastonia, NC-SC had the largest net employment increase at 35,300, followed by Raleigh, 30,700; Durham/Chapel Hill, 15,200; Winston-Salem, 9,000; and Greensboro/High Point, 8,400. Wilmington had the greatest percentage increase at 5.6%, followed by Greenville, 5.3%; Raleigh, 4.9%; and Durham/Chapel Hill, 4.8%.

North Carolina Rate 3.6%  
Not Seasonally Adjusted

Employment rebounded in North Carolina in October as our state's economy shook off the effects of latest COVID-19 outbreak. High levels of job openings, residential building permits, and retail sales activity indicate continued strength on the demand side of our economy. However, labor force participation remains well below pre-COVID levels, presenting a continued impediment to hiring. Expectations for economic growth in the Carolinas have declined in recent months, but remain positive, suggesting continued progress heading into 2022.

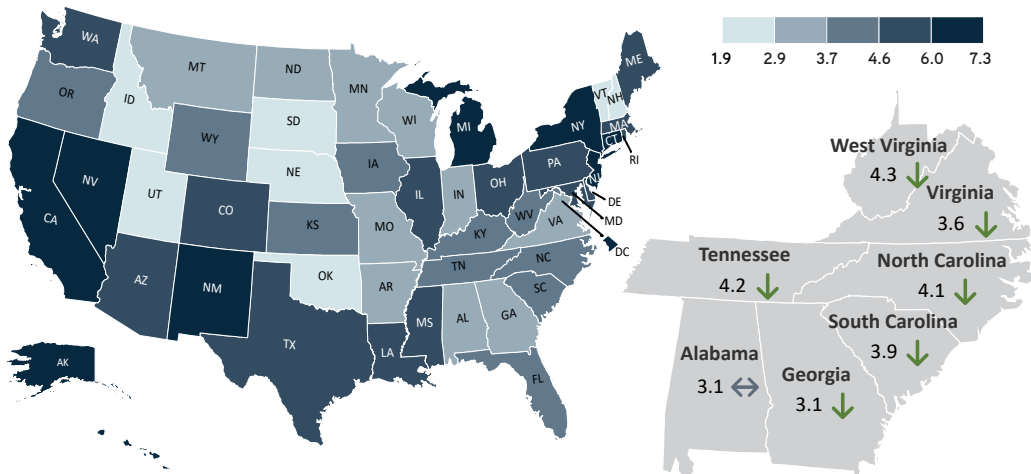

## Unemployment Rate Trend

**NC**  
↓ 1.0 percentage points from 5.1% in October 2016

**US**  
↓ 0.3 percentage points from 4.9% in October 2016
