North Carolina's September County and Area Employment Figures Released

RALEIGH — Unemployment rates (not seasonally adjusted) increased in 95 of North Carolina's counties in September, decreased in three, and remained unchanged in two. Scotland County had the highest unemployment rate at 12.0 percent, while Watauga County had the lowest at 4.6 percent. Thirteen of the state's metro areas experienced rate increases, one decreased, and one remained unchanged. Among the metro areas, Rocky Mount had the highest rate at 9.4 percent and Durham-Chapel Hill had the lowest at 6.0 percent. The September not seasonally adjusted statewide rate was 7.0 percent.

	Counties With Rates 5% or Below	Counties With Rates Between 5% and 10%	Counties With Rates 10% or Above
September	3	94	3
August (Revised)	10	88	2

When compared to the same month last year, not seasonally adjusted unemployment rates increased in all 100 counties. All 15 of the state's metro areas experienced rate increases.

The number of workers employed statewide (not seasonally adjusted) increased in September by 86,137 to 4,575,430, while those unemployed increased by 17,367 to 343,190. Since September 2019, the number of workers employed statewide decreased 344,447, while those unemployed increased 168,572.

It is important to note that employment estimates are subject to large seasonal patterns; therefore, it is advisable to focus on over-the-year changes in the not seasonally adjusted estimates.

The next unemployment update is scheduled for Friday, November 20, 2020 when the state unemployment rate for October 2020 will be released.

These data can be accessed on the Commerce website at <https://d4.nccommerce.com/>

Not Seasonally Adjusted

Estimates subject to monthly and annual revisions.

North Carolina Department of Commerce
Labor & Economic Analysis Division
Local Area Unemployment Statistics
(919) 707-1500

Accessing Data

The data presented in this press release, as well as historical data, can be accessed from NC Commerce's Demand Driven Data Delivery ("D4") system:

<https://d4.nccommerce.com/LausSelection.aspx>

Technical Notes

This release presents labor force and unemployment estimates from the Local Area Unemployment Statistics (LAUS) program. The LAUS program is a federal-state cooperative endeavor.

Labor force and unemployment--from the LAUS program

Definitions. The labor force and unemployment estimates are based on the same concepts and definitions as those used for the official national estimates obtained from the Current Population Survey (CPS), a sample survey of households that is conducted for the Bureau of Labor Statistics (BLS) by the U.S. Census Bureau. The LAUS program measures employment and unemployment on a place-of-residence basis. The universe for each is the civilian noninstitutional population 16 years of age and over. Employed persons are those who did any work at all for pay or profit in the reference week (the week including the 12th of the month) or worked 15 hours or more without pay in a family business or farm, plus those not working who had a job from which they were temporarily absent, whether or not paid, for such reasons as bad weather, labor-management dispute, illness, or vacation. Unemployed persons are those who were not employed during the reference week (based on the definition above), had actively looked for a job sometime in the 4-week period ending with the reference week, and were currently available for work; persons on lay-off expecting recall need not be looking for work to be counted as unemployed. The labor force is the sum of employed and unemployed persons. The unemployment rate is the number of unemployed as a percent of the labor force.

Method of estimation. Statewide estimates are produced using an estimation algorithm administered by the BLS. This method, which underwent substantial enhancement at the beginning of 2015, utilizes data from several sources, including the CPS, Current Employment Statistics (CES), and state unemployment insurance (UI) programs. Substate estimates are produced using the "LAUS Handbook Method", which is also based on data from several sources. Each month, census division estimates are controlled to national totals, and state estimates are then controlled to their respective division totals. Substate estimates are controlled to their respective state totals. For more information about LAUS estimation procedures, see the BLS website at <https://www.bls.gov/opub/hom/lau/calculation.htm>.

Revisions. Labor force and unemployment data for the previous month reflect adjustments made in each subsequent month, while data for prior years reflect adjustments made at the end of each year. The monthly revisions incorporate updated model inputs, while the annually revised estimates reflect updated population data from the U.S. Census Bureau, any revisions in the other data sources, and model reestimation.

Area definitions. The substate area data published in this release reflect the delineations that were issued by the U.S. Office of Management and Budget on April 10, 2018. A detailed list of the geographic definitions is available online at www.bls.gov/lau/lausmsa.htm.

Reliability of the estimates

The estimates presented in this release are based on sample surveys, administrative data, and modeling and, thus, are subject to sampling and other types of errors. Sampling error is a measure of sampling variability--that is, variation that occurs by chance because a sample rather than the entire population is surveyed. Survey data also are subject to nonsampling errors, such as those which can be introduced into the data collection and processing operations. Estimates not directly derived from sample surveys are subject to additional errors resulting from the specific estimation processes used.

Model-based error measures for seasonally adjusted and not seasonally adjusted data and for over-the-month and over-the-year changes to LAUS statewide estimates are available online at www.bls.gov/lau/lastderr.htm.

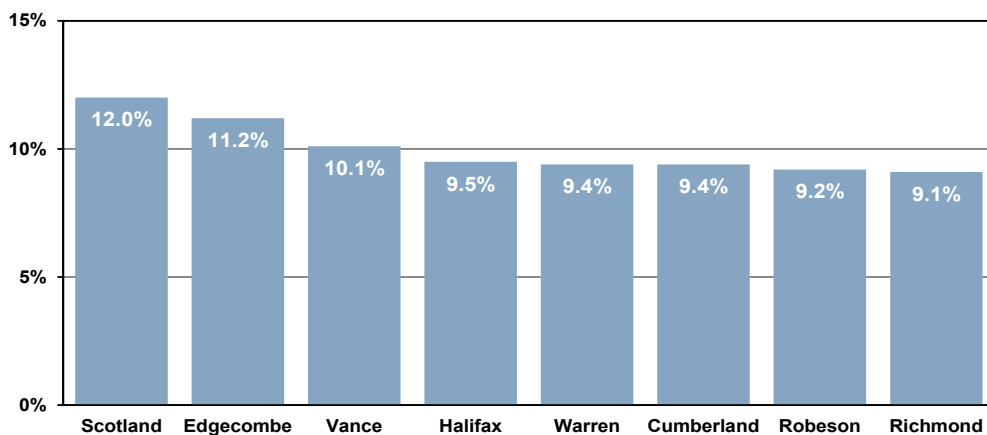

Release Dates

The next unemployment update is scheduled for Friday, November 20, 2020 when the state unemployment rate for October 2020 will be released.

The complete 2020 data release schedule can be accessed at:

<https://www.nccommerce.com/documents/release-dates-unemployment-rates>

Counties With Highest Unemployment Rates September 2020* (Not Seasonally Adjusted)

North Carolina's statewide unemployment rate (not seasonally adjusted) was 7.0 percent in September. This increased 0.2 of a percentage point from August's revised rate, and grew 3.6 percentage points over the year.

Over the month, the unemployment rate increased in 95 of North Carolina's 100 counties. Sixty-seven counties had unemployment rates at or below the state's 7.0 percent rate.

Scotland County recorded September's highest unemployment rate at 12.0 percent, followed by Edgecombe at 11.2 percent. Watauga had the lowest unemployment rate at 4.6 percent.

Counties With Lowest Unemployment Rates September 2020* (Not Seasonally Adjusted)

Unemployment rates increased in 13 of the state's 15 Metropolitan Statistical Areas (MSAs) over the month. The Rocky Mount MSA had the highest unemployment rate in September at 9.4 percent, followed by Fayetteville at 9.3 percent. Durham/Chapel Hill MSA reported the month's lowest unemployment rate at 6.0 percent, followed by Raleigh at 6.1 percent, and New Bern at 6.2 percent.

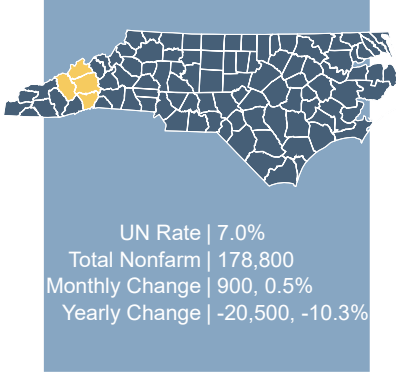

Metropolitan Statistical Areas' Unemployment Rates September 2020* (Not Seasonally Adjusted)

*All September 2020 data are preliminary.

*Data unavailable due to sample cell size. Note: All data are Not Seasonally Adjusted. All September 2020 data are preliminary.

Over the month, all of North Carolina's 15 MSAs experienced net job growth. Charlotte/Concord/Gastonia, NC-SC had the largest net employment increase with 9,400, followed by Raleigh, 7,000; Greensboro/High Point, 5,900; Durham/Chapel Hill, 5,100; and Winston-Salem, 4,200. Greenville had the greatest percentage increase at 2.6 percent, followed by Goldsboro, 2.2%, Fayetteville, 1.9%, and Greensboro/High Point, 1.8%. It is important to note that employment estimates are subject to large seasonal patterns; therefore, it is advisable to focus on over-the-year changes in the not seasonally adjusted series.

Over the year, employment decreased in all 15 MSAs. Charlotte/Concord/Gastonia, NC-SC had the largest net employment decrease at 82,800, followed by Raleigh, 46,800; Greensboro/High Point, 27,600; Durham/Chapel Hill, 20,800; and Asheville, 20,500. Asheville had the greatest percentage decrease at 10.3 percent, followed by Hickory/Lenoir/Morganton, 9.3 percent; Fayetteville, 8.4 percent; and Greenville, 8.2 percent.

North Carolina Rate 7.0%
Not Seasonally Adjusted

North Carolina recorded a fifth consecutive month of job growth in September. The unemployment rate increased over the month, alongside a gain in labor force participation, but initial claims for unemployment insurance continued to decline. Business contacts surveyed by the Richmond Fed expect conditions in the Carolinas to continue improving over the next six months.

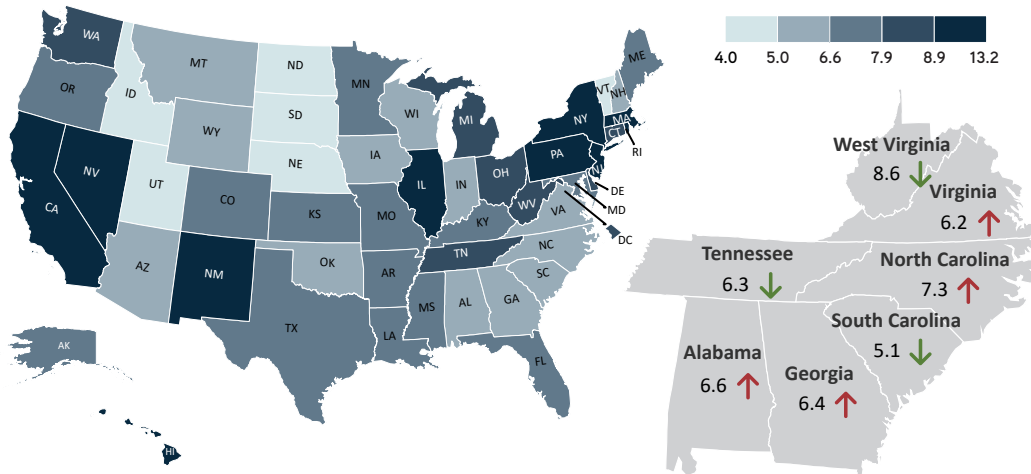

Unemployment Rate Trend

NC ↑ 1.7 percentage points from 5.6% in September 2015

US ↑ 2.9 percentage points from 5% in September 2015

Unemployment Rate Comparison

Expected Future Business Conditions

NC/SC This is an index of expected business conditions over the next six months based on a survey of contacts in the Carolinas. A positive number reflects expected growth, while a negative number reflects expected decline.
